Quiz Activity (3rd CSE-B)

Conducted on (19-2-2016 Day order 4, 6th hour)

Our class has been splited into two team. Each team consists of 25 members from both boys and girls.

Team 'A' was leaded by chockalinga prasanna and Team 'B' was leaded by lalitha varalakshmi.

The activity consist of 5 rounds.

4 rounds are Questions based and the last round was like a mime activity.

The Questions are taken from Artifiual Intelligenu. Each team prepared 4 Questions and One keyword related to AI.

So totally there are 8 Questions.

The members from team A asks rises the Question to TeamB. And Team B discuss the answers. ☺

After deciding, the correct answer will be given by anyone of teamB.

The time given for each Question was 1 minute.

Some of the discussed Questions are given below.

1. In which year AI was Introduced?
2. Different types of searching algorithm?
3. What is meant by Big Jumb?

and so on.

In last round, A volunteer from each team is called on and a word is given to them.

They are asked to ack, the word to their respective teams, the team members are expected to find the word.

At the end of activity, scores are calculated for both the teams. and the result was tie.
