Activity: Dumbcharades

An activity was conducted on 5/3/16,
^{present} Dumbcharades, for which our class of 36 members
were into 3 groups code named as Last to face (PTF),
Twelve Twinkles (TT) and the Technically Versatile
scholars (TVS). Each team gave a list of terminologies
related to SE, to our faculty-in-charge. Under
each round, ^{one from} each team acted a word selected
by the faculty-in-charge, more or like mimed
and the respective team guessed the terminologies.
At the end, teams TVS and TT clashed into a tie,
leaving behind PTF. As a result of the activity
we learned and get familiar with SE terminologies
in a whole lot different manner.
